MarbleShell M MS20

- Modern front panel design with optimized airflow
- Strong cooling potential
- Support addressable RGB lighting synchronization
- Pre-set 13 lighting effects
- Integrated addressable RGB hub to keep 6 devices lighting in sync
- Flexible system configuration
- Edge-to-edge tempered glass side panel

MarbleShell MS20, a mini-tower computer case, features a modern front panel design. The preinstalled 2 addressable RGB fans in the front and 1 fan at the rear can generate optimized airflow and improve the overall cooling performance.

The flexible system configuration can accommodate graphic cards up to 368mm in length, CPU cooler up to 164mm in height, PSU up to 160mm in deep and 280mm radiator.

MarbleShell MS20 series has a black and white version; it is your perfect selection to decorate your room and be your gaming rig.

Features

Modern Front Panel Design with Optimized Airflow

A unique, marble-styled front panel design presents a contemporary look. Pre-installed 2 addressable RGB fans show stunning lighting effects and provide ample airflow for better cooling performance.

Strong Cooling Potential

Pre-installed 2x120mm addressable RGB fans in the front and 1x120mm fan at the rear for efficient cooling.

The interior space can install up to 6x120mm or 4x140mm fans or up to a 280mm radiator in the front.

Support Addressable RGB Lighting Synchronization

Support motherboards that have a 5V addressable RGB header and be able to control the lighting effects through the motherboard software, including ASUS Aura Sync, GIGABYTE RGB Fusion, MSI Mystic Light Sync and ASRock Polychrome.

■ Pre-set 13 Lighting Effects

MarbleShell offers 13 lighting effects allowing you to select your preferred lighting style through the top I/O port.

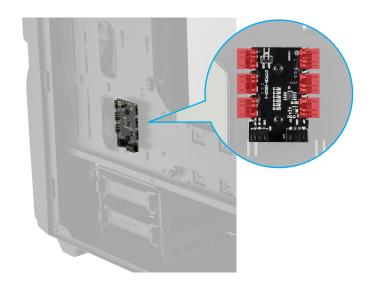

- * Long press the lighting control button for 2~3 seconds to switch the RGB sync controlled by M/B or case
- * The **reset button** is on the front I/O panel which is replaced by the **lighting control button**

Integrated Addressable RGB Hub

For those who do not use the RGB motherboards, the integrated hub allows users to keep 6 addressable RGB devices' lighting in sync.

■ Flexible System Configuration

Accomodate with Micro-ATX/ Mini-ITX motherboards, graphic cards up to 368 mm in length, CPU cooler up to 164mm in height, and PSU up to 160mm in deep.

■ Flexible Storage Option

Support up to 6x2.5" SSD or 2x3.5" HDD drives which you can install behind motherboard or on the tunnel to provide more choices of storage option for your system.

■ Edge-to-Edge Tempered Glass Side Panel

Full-view tempered glass side panel allows you to show off your rigs.
